TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C, C++, Racket, Luau, HTML, CSS, Bash
Frameworks & Tools: React.js, Vite, Tailwind CSS, Node.js, Firebase (Auth, Firestore, Cloud Functions), OpenCV, Git/GitHub
Concepts: REST APIs, LLM Integration & Tool-Calling, Model Context Protocol (MCP), Object-Oriented Programming, Data Analysis
Business Tools: ZoomInfo, MyPhoner (CRM), Shopify, RocketReach, Excel

TECHNICAL PROJECTS

Lumen — *Lead Tracking & Scoring Tool* | *Python* Oct 2026 – Present
- Built a Python call-logging tool for Haneco cold calling that replaced a manual spreadsheet and cut logging time per call by about 50%
- Tracks around 40 calls a day and flags which leads need a follow-up, supporting a target of 18 follow-ups from each day's calls
- Developing a PyTorch model trained on past call outcomes to grade which leads are worth calling and which to drop

Fillsight — *Gas Price Analytics Web App* | *React, TypeScript, Vite* Oct 2026 – Present
- Building a GasBuddy alternative for the Greater Toronto Area that tracks gas prices across stations and adds analytics on top
- Shows historical prices, intraday price changes, and the cheapest stations in an area so drivers can pick the best time and place to fill up

UW Course Planner — *Full-Stack Web App + AI Advisor* | *React, TypeScript, Firebase* Feb 2026
- Built a course planning app with React (Vite), TypeScript, and Tailwind CSS, using Firebase Auth and Firestore to save each user's plans across sessions
- Pulled live course descriptions, codes, and prerequisites from the University of Waterloo Open Data REST API
- Built an AI advisor on the Gemini 2.5 Flash API behind a Firebase Cloud Function so the API key never reaches the browser; a multi-turn tool-calling loop checks real prerequisite data before recommending courses

Person Tracker — *Raspberry Pi + Computer Vision* | *Python, OpenCV* Aug 2025

Collaborative project
- Built a real-time human tracking device in Python using OpenCV on a Raspberry Pi that detects a target and follows it across the frame
- Converted the target's offset from the frame center into pan-tilt servo commands, then tuned detection and servo response for smooth tracking with minimal lag

WORK EXPERIENCE

Haneco Lighting Canada Sep 2026 – Dec 2026
Energy Specialist — Co-op *Markham, ON*
- Call around 50 leads per day from MyPhoner to book business meetings, working toward a target of 10 booked meetings per week
- Use ZoomInfo to find decision-makers at target companies and log every call outcome and follow-up in MyPhoner (CRM)
- Send outreach emails to businesses to follow up on leads and open new conversations
- Inform business owners about government incentive and rebate programs, such as Save on Energy, for lighting and solar upgrades

Kumon North America, Inc. Jun 2026 – Present
Assistant Tutor — Part Time *Markham, ON*
- In charge of about 80% of the centre's online tutoring, making sure online students are well supported outside the classroom
- Mark all online student submissions and return graded work, covering the centre's complete online marking load

Kumon North America, Inc. Mar 2022 – Aug 2025
Assistant Tutor — Part Time *Richmond Hill, ON*
- Tutored 50+ students per week across elementary to Grade 12 levels in math and reading, adapting to different learning styles
- Managed a busy classroom of 30+ students at once, keeping things organized, on track, and running smoothly
- Gave parents regular progress updates and kept 100% accuracy in marking, data entry, and student progress tracking

Trademark Industries Inc. Sep 2023 – Jan 2024
Sales Associate & Warehouse Packer — Co-op *Markham, ON*
- Handled customer service, inventory management, and restocking on a high-volume sales floor
- Used Shopify, RocketReach, and Excel to organize order data, support customer outreach, and keep distribution running efficiently
- Packed and shipped 50–100+ orders daily, including large-scale fulfillment for Walmart, Costco, Home Depot, and Canadian Tire
- Created and managed social media content for TikTok and Instagram to grow product visibility and customer outreach

AWARDS & CERTIFICATIONS

Awards: University of Waterloo President's Scholarship | Harvard CS50x (2023) | Kumon Math & Reading Program Completer | WHMIS 2023

EDUCATION

University of Waterloo Sep 2025 – Apr 2030
Honours Mathematics, Applied Mathematics with Scientific Computing & Machine Learning *Waterloo, ON*
- **Relevant Coursework:** CO 250, STAT 230, CS 136, CS 136L, PD 1, PD 11, ECON 101, ECON 102
